EDUCATION

University of Texas at Dallas <i>Doctor of Philosophy in Computer Science</i>	Richardson, United States <i>Jan. 2026 – Present</i>
Jahangirnagar University <i>Bachelor of Science in Computer Science and Engineering (CGPA: 3.84 Position: 3/59)</i>	Dhaka, Bangladesh <i>Feb. 2019 – May 2024</i>
Holy Cross College <i>Science (GPA: 5.00/5.00)</i>	Dhaka, Bangladesh <i>2016 – 2018</i>
Bangladesh Bank Adarsha High School <i>Science (GPA: 5.00/5.00)</i>	Dhaka, Bangladesh <i>2006 – 2016</i>

EXPERIENCE

Teaching Assistant <i>University of Texas at Dallas</i>	Jan 2026 – Present <i>Richardson, United States</i>
Junior SQA Engineer <i>Dynamic Solution Innovators Ltd.</i> - Ensured quality of a Bangladeshi government project named IPemis under DPE, Bangladesh - Completing a training on Automation using Cypress offered by the company	Apr 2024 – July 2025 <i>Dhaka, Bangladesh</i>
MERN Development Intern <i>bongoDev</i> - Developed Employee Management, Pagination, E-commerce projects - Gained hands-on experience in POSTMAN, Docker, CI/CD, SDLC - Explored ways to visualize Github collaboration and code review in software industry	March 2023 – September 2023 <i>Dhaka, Bangladesh</i>
Executive Member of JU Robotics Club <i>Department of CSE</i> - Implemented Line Following Robot, Soccer Bot, Wirebuzz Game - Participated in Robotics competitions held at IUBAT and CU - Took managerial responsibilities: Notion maintenance, member recruitment	Jan 2023 - May 2024 <i>Jahangirnagar University, Bangladesh</i>

RESEARCH

Extracting Mode of Optical Fiber <i>Matlab, Computational Intelligence</i> Research project to solve the modal equation of optical fiber that ensures maximum light passing using two evolutionary algorithms: PSO and GA	Under Review
A Comparative Analysis of Machine Learning in Stroke Prediction <i>Python</i> Implemented algorithms like Random forest, XGBoost on large dataset	Under Review

PROJECTS

Robot Simulation Project <i>Python, GitHub, YouTube</i> Code - A robot simulation project by Dr. Joshua Bongard, Professor at the University of Vermont, USA. - Using pyrosim package provides several methods to simulate robot movements in a 3D surface. - Proper github usage maintained and in every step proper testing and analysis are done. Also the outputs are uploaded in YouTube channel. Click here to view	Jan 2025 – Present
Employee Management System <i>JS, Express, React, MongoDB, Docker</i> Code - In admin panel, user can log in/register, view employee list, perform CRUD on employees, see charts(Line chart, Bar chart), search by different categories - Applied authentication using JWTToken library - Used Material-UI library and implemented dockerization	Completed

Product Renting System | *Python, Agile SDLC, Testing* | **Code** Completed

- In this system, people can rent products or upload products for rent. Delivery will be handled by the system
- Working on Payment feature development: Advance payment, Monthly payment, EMI payment
- Collaborating with team members in Github, Discord, Trello, Notion

My Portfolio | *React, CI/CD, Github Actions* | **Code** Completed

- A multipage portfolio of mine deployed in github.io
- CI/CD has been used for automation

TapLock: Fingerprint Based Locker System | *IoT, Fingerprint Recognition* | **Code** Completed

- Allows users to unlock the lock using their fingerprints, enhancing security.
- Users can pay through the Android app, TapLock, to retrieve their belongings.
- Ensures that only authorized individuals can access the lock and pay for item retrieval.

ACHIEVEMENTS

Yearly Merit Stipend from University: 2019-2022 at JU

Stood 12th out of 50 teams in LFR Competition: January, 2023 at IUBAT

Organized Intra Department Robotics Competition: April, 2024 at CSE, JU

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, HTML/CSS, Bootstrap

Frameworks and Database: Cypress, React, NodeJS, WordPress, Material-UI, Postman, SQL, MongoDB

Developer Tools: Git & Github, Docker, VS Code, Google Colab

Libraries: mongoose, unittest, JWTToken, pandas, numpy, matplotlib
